EDUCATION

The University of Texas at El Paso Expected May 2028
Bachelor of Science in Computer Science, Minor in Mathematics **GPA: 3.73 / 4.0**

- **Honors:** Dean's List (Fall 2024, Spring 2025, Fall 2025), 2025 Hispanic Scholarship Fund Scholar
- **Programs:** Aspen Ideas: Rising Generations (2026), Code2Career Fall 2026 Cohort
- **CS Coursework:** Operating Systems, Database Systems, Parallel Computing, Data Structures, Advanced OOP
- **Math Coursework:** Matrix Algebra, Probability & Statistics, Discrete Mathematics, Calculus II

EXPERIENCE

Google | Associate Software Developer Intern (STEP) May 2025 - August 2025
Google Cloud, Workspace Policy Infrastructure Sunnyvale, CA

- Redesigned a policy compilation pipeline from batch processing to per-entity parallelism, cutting p50 latency by **30%**, reducing QA median latency from **642 ms to 589 ms (8.3%)**, and raising throughput **15%**
- Migrated **6** modules to Google's async dataflow framework: test coverage **60% to 95%**, reviews **20%** faster
- Shipped a **zero-incident** rollout across Dev, QA, and Prod through a **10-step** gated launch plan, backed by **50+** unit and integration tests and **7** monitoring dashboards tracking latency, error rates, and system health

Boys & Girls Club of El Paso | STEAM Specialist May 2026 - August 2026

- Led **50+** STEAM workshops at **4** club locations, reaching **200+** youth and raising program engagement **35%**
- Designed **15+** robotics, 3D printing, and Python coding projects, driving a **40%** increase in STEM participation

PROJECTS

Relay | Next.js, TypeScript, Postgres, Server-Sent Events, Groq, OpenAI, Anthropic July 2026

- Built an async AI job platform in TypeScript that returns a job ID instantly while background workers run long LLM tasks with **3-attempt** retries, linear backoff, cancellation, and per-job cost tracking
- Unified **3** LLM providers behind one interface, powering **5** Zod-validated workflow recipes with live SSE status
- Hardened the API with idempotency keys, a **30 req/min** token-bucket rate limiter, and HMAC-signed webhooks

CohortCove | Next.js, TypeScript, PostgreSQL, Prisma, Vercel, Vitest, Playwright August 2026

- Shipped a full-stack campus events platform with verified sign-up, search, RSVPs, and moderation
- Prevented overbooking with Postgres row locks, proven by **20** concurrent RSVPs to a **1-seat** event confirming one
- Wrote **26** Vitest and Playwright tests against a real Postgres database, including axe accessibility scans

Sentinel | Python, FastAPI, React, scikit-learn, Postgres, Redis, Docker June 2026

- Trained **3** fraud models (logistic regression, random forest, isolation forest) on **284K** card transactions
- Served models via a FastAPI scoring API that sends the **top 5** risk factors per transaction to a React dashboard
- Scored models on **10+** imbalance-aware metrics (PR-AUC, recall at precision, F2), plus drift monitoring

LEADERSHIP & INVOLVEMENT

Society of Hispanic Professional Engineers (SHPE) | Research Technical Specialist September 2026 - Present

- Support freshman and sophomore engineering research teams as they scope questions and refine posters

ColorStack, UTEP Chapter | Technical Officer August 2025 - Present

- Run technical programming for underrepresented CS students, from hands-on workshops to tech events

Google Developer Groups on Campus, UTEP | Mentor February 2025 - Present

- Mentored **3+** underclassmen across **2** mentorship cohorts, guiding project planning and interview prep

The Cornerstone Project | Civic Engagement Organizing Fellow September 2026 - Present

- Organize nonpartisan voter registration and civic outreach on the UTEP campus as part of a statewide initiative

Lowe's x HSF Retail Immersion Program | HSF Scholar August 2026

- Selected for a national HSF Scholar cohort for a **3-day** corporate immersion with Lowe's teams in Charlotte, NC

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, C, C#, Go (Golang), SQL, HTML/CSS, Assembly (RISC-V), Verilog
Frameworks: React, Next.js, Node.js, FastAPI, Prisma, Tailwind, React Native, Electron, scikit-learn, Zod, WebSockets
Cloud & Data: PostgreSQL, Redis, BullMQ, Google Cloud Platform, Vertex AI, Vercel, Supabase, Linux
Testing & DevOps: Git, Docker, GitHub Actions, CI/CD, pytest, Vitest, JUnit, xUnit, Playwright
